FTP The is a service for managing drawings created in AutoCAD or any other CAD software. It allows users to upload their CAD drawings to the Internet. Users can then download the drawings and manage them using the provided web application. AutoCAD, with the ability to import and export to DXF, enables rapid, low-cost exchange of drawings with other CAD software. The ability to extract graphics from drawings created in other CAD programs increases the speed of extraction and allows for better visual control over the drawing. AutoCAD's DXF import also supports object information from drawings produced by many other CAD programs, including most DGN variants, SolidWorks, Creo, Navisworks, IDS, Tekla, ArchiCAD, TeklaCAD, Magics, GemCAD, PowerDraft, MicroStation, CAE, Silvia, FAST, Bentley System Architect, eDrawings, Blueprint, Plant3D, CIM-CAD, and MicroStation. All of these products (except MicroStation) are provided as native plug-ins to AutoCAD. AutoCAD Architecture (CADD) AutoCAD Architecture (CADD) is a cross-platform CAD application for architectural and urban design. It is developed by ARASA, a joint venture of ARASA (AutoCAD Architectural Research and Services) and Alza Corporation. It is designed to provide architectural professionals with the freedom to create, view, explore, and save a design model in any of these cross-platform formats: AutoCAD, ArchiCAD, Plant3D, DesignSpark, MicroStation, CIM-CAD and AutoCAD LT. AutoCAD Civil 3D AutoCAD Civil 3D is a cross-platform CAD application, part of AutoCAD LT, that helps users complete projects such as commercial, industrial, and institutional buildings, landscapes, mechanical equipment, civil engineering, and more. AutoCAD Civil 3D offers a variety of functional capabilities, including tools to simplify design tasks, such as an innovative kite-and-string tool to draw complex piping networks, a mechanical tool to create assemblies of basic parts, and tools to help you add custom features. AutoCAD Civil 3D also includes a variety of working tools for creating 3D models and converting DWG, DXF, DWF, and DWG2 files to 3D models.
