GET MEdit ===== New Releases ===== About this Download ===== The installer for the previous version of the program was modified to allow the use of the mid files that are stored in the same folder where it is being installed. After installing the program, you need to go to the main folder, and create a new folder with your.mid files. In that folder, and using the installation directory, it will be created a new folder with the previous version, in which you have the actual program installed. The old version is installed in a separate directory, that will allow you to use its files and applications, in case you want to make a new copy of the program.
