Q: Azure App Service Deploy and Set Permission in PowerShell I have an Azure website that contains an Application Setting with a value of "test". This value is checked into source control. When my app service worker role is deployed, this value is updated with PowerShell. If I try to automate a publish from powershell with the Update-AzureServicePlan cmdlet, the website is published and the Application Setting does not update. If I manually deploy the app service, the value gets set. How can I deploy a website using PowerShell and have that website set the Application Setting? Q: Vbscript Math.sqrt issue here is a fragment of my code. One of the lines produces 'Operand of '/' is a non-real number' error and I'm out of ideas to fix it! WHen I replace this line with a static number (e.g. 1.5, 1.53 etc..) it works... Any ideas? 'A(:,1:3) = NR2d(:,1:3)' A(i,j) = sqrt((B(i,j))**2 + (C(i,j))**2 + (D(i,j))**2) A: This is probably because one or more of the values in the array are not numbers. You might try to add a cast, like this: A(i,j) = sqrt((B(i,j))**2 + (C(i,j))**2 + (D(i,j))**2) A(i,j) = SQRT((CONVERT(Long, B(i,j)), CONVERT(Long, C(i,j)), CONVERT(Long, D(i,j))) ** 2) Deck of Cards: A Deck of Cards brings the interactive experience of playing cards to your mobile device. Take on your opponent with "Casual Matchup" or Challenge your friends with the "Social" game. Create your own deck to play with or export an existing deck.
