Fever, erythema, tenderness, and pain are the main complaints of patients with skin emergencies and the first principles of therapy are to treat the symptoms. The initial treatment of a patient with a skin condition should be conservative. Compression (with a bandage) is recommended in painful conditions like pyoderma and ischemia in venous ulcers. Circumcision, partial cautery, and incision and drainage are the main techniques used in the treatment of skin infections. When a patient's condition is life-threatening, rapid diagnosis and immediate treatment are the main principles. The absolute indications for incision and drainage include cellulitis, furunculosis, abscess, and infected ulcers and draining abscesses.Q: Create template option in Magento2 catalog_category_view.xml I want to change the grid on catalog_category_view.xml with a certain template. So far, I have: 3e33713323
