There are two different ways in which you can use the AutoCAD application. 1. Graphical User Interface (GUI) 2. Non-Graphical User Interface (Non-GUI) The GUI method is the traditional one. It is like the way we used to use a word processor or an Excel. With the GUI method, you can place your cursor anywhere and press the keys to draw. While in the Non-GUI method, you cannot place your cursor anywhere, but you can draw by drawing lines. The best thing about the non-

GUI is that it does not have a learning curve. There is no need

History The original AutoCAD application ran on DOS, Windows 3.0, and Windows NT. AutoCAD's new interface for Windows 95/NT/2k/XP was the first to render architectural objects in Windows, although it had been possible to do so on the Mac earlier, using the Gimp. Future A new program, named "AutoCAD Architecture", was announced by Autodesk on November 18, 2015 and will be released in 2016. AutoCAD Architecture was built to connect architects to CAD software to create better drawings, make plans and to generate BIM models. A new product, Autodesk Revit,

which resembles the interface of AutoCAD, was announced in May 2011. It is available for download as of June 2011. Revit also appears to be considered the replacement for AutoCAD Architecture. On the 13th of February 2016, Autodesk officially announced the discontinuation of AutoCAD for Windows and AutoCAD LT for Windows (including all future major and minor updates). On February 21, 2016 the AutoCAD family of products on Autodesk Exchange app is also discontinued. AutoCAD LT will be updated with "substantial" user interface improvements and "enhancements to some core features". AutoCAD LT is "compatible" with the new Autodesk DWF/DXF products (AutoCAD Architecture and Revit). On March 3, 2017, Autodesk announced the discontinuation of

the AutoCAD LT line of products. On September 26, 2016 Autodesk announced the re-branding of AutoCAD Architecture as "AutoCAD". It is compatible with the main AutoCAD product, to be released in early 2018. Autodesk also sells AutoCAD LT software (including the latest major/minor upgrades) on their subscription service, available for only $9.99 per month. Reception AutoCAD has won the American Business Awards in 1994, 1996, 1998, 2002, 2005, 2007, 2008, 2009, 2010, and 2011, and the awards for the best product in the architecture, engineering, and construction industry in 2005, 2006, 2007, 2008, 2009, and 2010. The program was also awarded as the best CAD program in the 2007 Computerworld "Dell PowerEdge Small Business Best of the Best Awards".
