AI Enlarge PhotoLabs Key Features - You can choose to magnify the image by 2x or 4x (or your own preferable scale) - Set the sharpening level - Export either PNG or JPEG image - User-friendly interface - Performs numerous mathematical operations - Will process the entire image within seconds

What we thought about AI Enlarge PhotoLabs It is very easy to use AI Enlarge PhotoLabs, as it comes with a clean and intuitive interface. There are no

additional steps or options you need to delve into, so you can skip the tutorial if you are not into that kind of stuff. If you are just loading an image, it won't require any explanation at all. The application automatically detects the right files size, so you can be sure that you are not wasting any space on your device's memory. In order to process an image, you only need to provide the initial size (2x or 4x) and press Start. Pros: - Easy and intuitive interface - Automatic detection of image size - Works on both Android and iOS -

Performs multiple mathematical operations - Suitable for novice users - User-friendly interface - Minimalist design

Cons: - It takes time to perform all the mathematical operations - Option to keep image unmodified can only be accessed via additional button

Video Review Should You Buy It? If you are looking for a free magnify/enlarge app which comes with a minimalist UI, you should check out AI Enlarge PhotoLabs. Its user-friendly interface is pretty basic, so if you are a novice or just starting with

digital photo editing, AI Enlarge PhotoLabs should be your first choice. Moreover, the app supports all the major platforms and free access to all the available modes - pretty much any question you might have, you can google for an answer. However, to perform a more extensive task, you need to expand your options and the app supports: - Scaling images by 2x or 4x - Sharpening the image - Setting a threshold - Cropping - A lot more At the same time, one thing to keep in mind is that AI Enlarge

PhotoLabs uses quite a few resources to operate. It can be slow to load large images, even if they are not even 2x or 4x bigger than the original
