The present invention relates to a sheet member feeding apparatus and an image forming apparatus, and particularly to a sheet member feeding apparatus which feeds a sheet member from a bottom tray (a lowermost tray) which is disposed at the bottom of a sheet paper feeding cassette, and an image forming apparatus provided with the sheet member feeding apparatus. In a related image forming apparatus, as disclosed in the Unexamined Japanese Utility Model Publication No. 57-129038, a sheet member feeding apparatus is disposed under a paper feeding tray and feeds an uppermost sheet member from the paper feeding tray. Also, in another related image forming apparatus, as disclosed in the Unexamined Japanese Utility Model Publication No. 60-186956, there is provided a sheet member feeding apparatus which is disposed under the paper feeding tray so as to feed the uppermost sheet member from the paper feeding tray. In the former related image forming apparatus, there is provided only a paper feeding tray of which bottom tray is fed by the sheet member feeding apparatus. Therefore, the sheet member feeding apparatus is disposed so as to not interfere with an image forming unit, and thus the image forming unit and the sheet member feeding apparatus do not need to be separated from one another. In the latter related image forming apparatus, the sheet member feeding apparatus is disposed so as to be above an image forming unit and a process tray (a lowermost tray) is disposed below the image forming unit. Therefore, the sheet member feeding apparatus and the process tray are separately provided and the separation between the image forming unit and the sheet member feeding apparatus has to be performed. In addition, since the sheet member feeding apparatus is arranged as shown in FIG. 4 of the Unexamined Japanese Utility Model Publication No. 60-186956, it is difficult to manufacture the sheet member feeding apparatus.
