Get the job done with the most demanding task manager TasksManager is a Windows utility that features a user-friendly interface, a vast inventory of tools, an intuitive scheduler and customizable reporting. You will feel much more organized thanks to TasksManager! The program's plain and intuitive interface makes it easy to quickly find and install tasks. By using the wizard-style setup, it takes you less than five minutes to get going. The program is extremely customizable since you can easily configure it to suit your requirements. This way, you will be able to run a task manager for any specific task. The vast inventory of tools is carefully planned and organized according to their groupings. This way, you will be able to quickly access tools that you need. The scheduler automatically creates a list of running tasks. You can further add tasks to this list as you go. Each task is represented as a single window. Through the tabbed interface, you will be able to view the current status of your running tasks. You will also be able to see a preview of the next due date for a particular task. You can use the nifty calendar window to manually set the due dates for all of your tasks. The calendar window can be dragged and resized to meet your requirements. To view the status of your running tasks, you can use the handy progress bar or list of running tasks. You can also opt to run a task at a specific time. For other tasks that are not on the schedule, the program displays information including total time, error code, and more. The default settings will show all of the running tasks, as well as a representation of the recently added tasks. You can further customize how the program displays its running tasks. You can use shortcuts to quickly access all of your running tasks. You can also create a task that is linked to a system protocol. The system will automatically run this task when this particular event occurs. A Task's properties can be manually edited using the Properties window. To alter the scheduled time of a task, you can use the Date & Time window. You can also preview the reports of your running tasks. You can additionally create custom reports and view them as PDF files. The program comes with a free trial version that includes a limited number of tasks.
