TOUCH SCREEN – Do not confuse the mouse or a touch screen with a touch panel. TABS – A series of buttons or tabs that may be displayed along a scrollable area of the user interface. TAGS – Many objects in AutoCAD contain a separate file with information about the object. A file with objects is called a TAGS (or a TAG) file, and can be placed in any folder. TAGS files contain attribute information about the drawing objects (attributes), and are used to control the objects and display information about them in an interface. TEMPORARY – An object that you make changes to, but that does not appear in the drawing until you apply those changes. TEMPLATE – A file, often a series of components, that you can use to create a drawing. You can create your own templates. Templates are added to the Templates dialog box. You can change the drawing settings of a template and re-use those settings when you create a drawing from that template. You can create as many custom templates as you like. You can store templates as XML files. You can store them as a template package. TEMPORARY OBJECTS – Objects that you create and change temporarily to test a drawing before you apply those changes to a drawing. AutoLISP AutoLISP was the first scripting language supported by Autodesk. In 1999, when AutoCAD was first released as a stand-alone application, AutoLISP scripting was included as part of the program. Scripts can be saved to and executed from AutoLISP files, and can be run on their own by selecting "Run" from the main menu. In AutoCAD Release 2014, AutoLISP scripting has been discontinued. Scripting functionality is now available through several products, some of which are available for both AutoCAD and AutoCAD LT. Visual LISP Visual LISP (VLISP) is a graphical programming language similar to AutoLISP. It was first introduced in 1999 as a front-end for AutoCAD. In 2000, a VLISP interpreter was included with AutoCAD. This implementation was replaced in 2012 by an interface for the Visual LISP interpreter, allowing use of VLISP scripts with all versions of AutoCAD, including AutoCAD LT. VLISP is also supported by Autodesk DWG Viewer, which can open, edit and save DWG files in the VLISP format. VBA Microsoft Visual Basic for Applications (VBA) is the scripting language for MS Office.
