AutoCAD 2017 offers a new release date called "later this year" that can be seen at AutoCAD 2017. An announcement by Autodesk indicates that AutoCAD 2018 will be available on October 31, 2017. As of 2017, AutoCAD 2018 is available to run on the latest Windows 10 and Windows 10 Pro versions of Windows 10, Windows Server 2016, Windows Server 2012 R2 and Windows Server 2012. AutoCAD 2018 is also available on macOS 10.11 "El Capitan" and later. AutoCAD 2018 supports Unicode 9, Unicode 10 and Unicode 11, which means that texts can be more easily edited and annotated for international users. AutoCAD 2018 is fully Unicode-aware, and supports international character sets. In addition to the three Unicode editions available for AutoCAD 2016, Unicode 2019 and Unicode 2020 are planned. In October 2014, Autodesk announced that it was acquiring the Alias suite of computer-aided design (CAD) and computer-aided manufacturing (CAM) software, thus uniting the two into a single offering. This transaction is set to close later this year, subject to regulatory approval. According to the press release, the combined company is "the leading provider of enterprise-wide CAD and CAM software for the design and manufacturing of a wide variety of products". Autodesk's largest shareholder was Microsoft, which sold $4.8 billion worth of shares to Autodesk in 2016. Add-ons and extensions AutoCAD is complemented by a large number of add-ons and extensions.
