AutoCAD With Key Download [Win/Mac]

The early version of AutoCAD was simple to use and was intended for non-expert users. However, AutoCAD has grown in features, functionality, and complexity to a level that requires an advanced CAD user's training and expertise. One factor that led to the increased complexity was the introduction of powerful CAD modeling tools. In 2006, Autodesk bought Stentor to form a new entity called Stentor + Autodesk. As part of the acquisition, Autodesk acquired all existing Stentor software. Stentor + Autodesk was later renamed Autodesk Developer Labs. The new company produced the AutoCAD software for non-commercial use as a cloud-based service. As part of the new Autodesk collaboration model, the cloud-based services have been rebranded under the new Autodesk's "AutoCAD 360" umbrella brand. With the software app integrated with the cloud, the new Autodesk's "AutoCAD 360" app provides a more powerful yet simplified version of AutoCAD to be used for commercial purposes. The app is available on multiple platforms, including Android and iOS. The software product includes a cloud platform and a desktop client. AutoCAD is available for commercial use as a desktop application, as a cloud service, or both. The desktop app is available as a perpetual license for \$499.00 as of March 14, 2019. The license is good for perpetual use on up to four PCs. The desktop app is accessible for as long as the license is valid. The cloud service is available for monthly, quarterly, or annual subscriptions starting at \$150.00. An annual license for the cloud service is also available for \$499.00. Features The latest version of AutoCAD was released in 2018, version 2018. The latest version has a redesigned user interface (UI). AutoCAD 2018 has a new "assistive technology" for visually impaired users. The app can be used with a mouse, touch, or stylus for input devices. In 2015, Autodesk launched a new cloud-based service called "AutoCAD 360". The new service integrates cloud-based components (as part of "AutoCAD 360") and Autodesk's "AutoCAD 360 Design" for cloud-based mobile apps.
