What's new:

The story begins as a hero wakes up one day in another world. He remembers the name Tarn, and decides that the first thing he will accomplish on that world is to look for his friends. However, for some reason he can't remember the way back, and leaves the town he wakes up in. Wandering in the Lands Between filled with wonders, he wanders and eventually finds his way to a nearby town. It has very lovely, elitist-looking inhabitants, and he decides to settle there. He is invited to their annual big party, and he's trying to figure out where he has met them before. He also tries to figure out why there's a city he remembers so clearly in another world, and why he can't find his way

home, as he has no memories of his family or friends. He quietly lives in the town, doing various things and making friends while trying to figure things out. TAMAHED

The game features both online play, which you can easily access at any time by tapping the "Trait" button, and offline play, in which you can use the characters you created as you wish. The game auto-plays.

The game also contains a vast world, which is further divided into various worlds as you move forward. As you explore the world, you will find a variety of different designs, which overlap in vast areas such as forests. With this arrangement, you are able to feel the vast world around you while traveling.

In addition to this, there is a large world map (which you can see on the main screen for the game when starting). The map is designed so you can easily recognize what areas are connected and where the navigation points are located, allowing you to easily find where the parts of the story will take place. You can also expand the navigation map as you like.

If you clear the 100% quest for one of the main characters, you can obtain the "Bard Root Weapon" as the reward.

With this weapon, you can summon a "Bard Performer" when working the TRAIT button in the combat scenario.

-- Materials Game begins in the town of Norville. The world map is displayed on the main screen. You can check the stats and quests of various characters and jobs by tapping the buttons in the left.*
