Hindi Movie Jigariyaa Download in HD 720p. movie.. 2,87 MB, Audio: -.Q: Read through multiple files in specific order in XSL Let's say I have five files in a directory: file1.xml file2.xml file3.xml file4.xml file5.xml Each of these files is in a format that I can parse with SAX, but not at the same time. In other words, I do not want any of these files to be parsed until all of them have been parsed before. I understand that I can wait until all files are parsed using a variable, but once I have those variables, how can I make it so the first file is parsed first? How can I make it so the fifth file is parsed first? I would also like to avoid using a batch file to automate my solution. A: You could load the 5 file names in a set of 5 variables and use the variable indexing, e.g.:
