Puzzle time! Avoid the explosion (or turn it to your advantage...) and destroy all the houses on the map with one of 50+ increasingly difficult puzzles! To solve some of the best puzzles you will have to understand the underlying mechanic - in many cases, it's as easy as rotating the whole house 180 degrees. For some, there will be a hint system, for others there will be a screen with instructions. But whatever happens, you will need to carefully think about the problem and come up with an appropriate solution - your job and your imagination will be the limit! What will you be solving? - Some of the 50+ puzzles will require more than one solution. Your creative options will be severely tested. ~Workshop~ Inspired by the best of flash games, the game contains a very customisable workshop, where you can change: -> The number of options for each puzzle (4-16) -> The music and sound effects -> The number of moves for every puzzle (2-8, also random) -> The color of every element of the puzzle -> The time to solve the puzzle (1-100 seconds) -> The length of the menus When done, please rate it well and share it with your friends! :D Apart from that, just like in flash games, you will have 2-4 levels per week, and you will unlock them all when you complete them. Animated, dynamic and bright, Explosion™ takes advantage of Godot, a versatile animation engine, specifically designed for games. Comic Book - A Story Mode Story Mode is a narrative-driven comic book game, inspired by the 1980s games from Bitmap. A story of cinematic love of superheroes, spies, adventures and feminism, accompanied with funny and unpredictable dialogues. You will play as Alisa, a young schoolgirl with extraordinary powers, forced to search for her friends after their school bus explodes. Developed in Unity 4 and Paper, a game template that allows you to work very quickly. Game Source Code is free to use, just with some restrictions... Controllers The game uses the arrow keys to move and use the camera. Press space to jump, the control stick to change camera orientation and use the mouse to look around the environment. Music Sound effects will be displayed as synthesized audio, created with Opus PCM format. Alisa A young, albeit small, sprite for AI

## **What's new in Nano Project:**

**package: Warriors Rage [v0.99], Air Warriors [v0.99], Kung Fu Climber [v0.99], and the 20 levels of the original Pulse Cage game (only without the banners and buttons), available as a Data File, in a custom resolution. The custom resolution is 1280x800 (the game looks somewhat strange in higher resolutions). From each savefile you need the Data Files from the corresponding.flw files. Last edited by LloydBlake; 2012-09-17 at 18:09. Reason: Adding some more details. Our dear hero has come across a strange puzzle. It's made of small cannonballs and only he can stop it. Start on a rampage with an ilusionary warrior attack that's always on your side. Jump over the cannonballs with the original Pulse Cage. Grab the flags to make it faster. Grab the map for a hint. Destroy the cannons with telekinesis to destroy the cannons. But watch the enemies. They know his secret. How to play: - Play by focusing on the right down-arrow. - Hold Space to pause. - Double Tab to check your score and load levels. - Left Tab to jump over a cannonball. - Right Arrow to change direction. - Left Arrow to jump up. - Down Arrow to step on another cannonball. - Z to warp telekinetically. - Swipe with your finger to throw a cannonball. - Press the down button to jump over the cannons. - Grab the command button to get the map. - Grab the radar for a hint. - Press Q to reactivate. - Press Up to go to the highest item. - Press L to go up. - Press Del to go to the left. About the game: The game was made by Tombot Games. The world is a tiny puzzle powered by a generator, called GAW (Generation Artificially Worshiped). GaW treats every integer created by humans as a god. GaW defends the world with his servant Rain. Every passing second, GAW creates a new prince for his descent into oblivion. The princes are divided into 3 categories (survivors, degenerates and puppets). Your character is a degenerate prince. Most of the game is your story of how you avoid the destruction of your nation. How can you defeat GAW? Find out for yourself.**
