FANTAS is a VR-game for PC with a totally immersive musical experience about having love in your heart. Through an original plot and an exciting gameplay, you are able to dive deep into the fantastical world of Fantas and discover the story of a love between two people. The procedurally generated world of Fantas is a new experience in Virtual Reality. It's been reimaged from the ground up to meet the highest VR standards. It is a fascinating mix of 3D models and original animation. Both the playable story events and dynamic environment are based on a brand new engine developed from scratch specifically for Fantas. For those who don't know, I'm working on my second book entitled "The Beginners' Guide to Fantasy Literature" - I'm writing it because I get a lot of requests about how to get into fantasy literature and there is a lot of confusion about what is fantasy, what is magic, and what is the difference between fantasy and sci-fi. So I am doing my part to try and clear things up. I'm really excited to help spread the word that all fantasies are not the same - that just like sci-fi, there is a big variety among fantasy.
