
it on my phone. It shows this message: VLC player could not make a complete data connection to the server. This is usually caused by a missing or misconfigured network or proxy setting. Access the settings in the settings menu. and when i click on settings menu it show this: The TomTom Easy Activator installer would like to perform some system-related operations that must be done before use. The setup wizard can determine if the installation is allowed. And then i can't get out of it because it is stuck at this screen for 5 minutes: It has been a while but i remember updating this app, i didn't install it like an app but with the installer, which is the only way to install this app because i have an Amazon Fire Stick too. So in the past some weeks the installation stucked at this point and i couldn't find a way to go past it without deleting the previous version of the app. I deleted the previous version and downloaded the newest one. After that when i started the installation process i saw this message: VLC player could not make a complete data connection to the server. This is usually caused by a missing or misconfigured network or proxy setting. Access the settings in the settings menu. So i opened the settings menu and i went to the wifi tab. After that it started to install like an hour ago and now is stucked again at the same point. I found this message in the log file: Looking on their forums, i've found a video which explains that it's possible to install it in another language. Now, after some time the installation was completed. When i open VLC in start up menu it shows a message: TomTom Easy Activator Your TomTom Easy Navigator is not activated. Please perform activation. TomTom Easy Activator 10 Full So i pressed Activate and i got this message: Please wait while TomTom Easy Activator performs system operations. After system operations are completed the navcore.dll will be updated. Please restart TomTom Easy Activator to update your navcore.dll. After that i
