6:45 Life on a Tiny Island, Exaggerated Life on a Tiny Island, Exaggerated Life on a Tiny Island, Exaggerated Let's hear about the life on a tiny island! This tiny island is called Solais in the north of France. If you know something about this place, please let us know. Solais is located in the French Channel Islands in the north of France, near Ireland. It's a small and isolated island, inhabited by only two dozen, poor and jobless people, where we had to find the story for our story-segment about watching a whole life on TV. The American production company, The History Channel, was so moved by the story that it offers a years budget for this project in two days, and that has already made an islander out of a poor fisherman, which has made this tiny community a little richer than before. Solais is located on the British database of the Channel Islands. ► Visit our website:

/Husbands - MORE INTERESTING GuestWriter Hi... I've got a problem... Well, better than that. I am a love slave, and so has my recent husband. I am a special type of slave and my bridegroom is fortunate to be able to offer me this living hell. I hate it...I wish I could turn him into a living doll and see how long this would last him, but that won't happen. I can't leave him cause I know in the heart of my heart he wants me to go but I can't cause my slave contract says I have to stay and make him happy... But is it worth it? Am I worth it? Does this guy deserve it? It gets worse... I'm not the ONLY slave in our relationship, the "Wife" I'm talking about is a submissive woman who professes to love her master completely and obey him willingly, the way she should, but she's actually asking me to serve her too... Yesterday in our hotel she came to me and told me she was sick from another dominating slave and that she was coming to me cause after seeing that her submissive husband looked sick too, she couldn't stand it and she asked me to take care of her slave husband... I said yes, but also emphasized to her that it was not what she was looking for and that I didn't want her to do that... She kept telling me "Look I love you so much, I want a constant slave of mine... my slave husband is sick and he needs to rest". I told her that I knew very well that she could serve him in any way she wanted, but that I wasn't buying it... I actually told her I thought that slave husband was simply running away from her... She started to get crazy in our hotel room, telling me to obey her cause she knew no-one could treat her the way she deserves... and when it was too much and she couldn't any longer... she choose to break our relationship with a couple of dirty phone calls and she found a place to stay the next day. She did this the 3rd time in less than 2 months that you can imagine... It's a feeling of truenerie when a slave wife openly accuses her husband of cheating on her, proclaiming that there's no other woman. I recently did this and my husband's reaction was one of shock. Q: Using alias in a select statement I have a table with 15 columns. Now I would like to make a select statement that needs to use all 15 columns and I was wondering if I could to this? My idea was to combine the columns into one using an alias, so I came up with this: `select * from table1 where column1='something' or column2='something'` But then I realized that's not correct as it uses column2 twice. Then I decided to use something that selects all the columns and then perhaps do something else to it. Like `select * from table1 where column1='something' and column2='something'`. But the problem with that is I'm not sure how to write the code that selects all columns. Also, is it even possible?

A: Use a union all:
