Football, the world's most popular sport, is in FIFA. Our creators wanted to create the most authentic and complete football experience on any gaming platform, so they gathered the best minds in the industry to reimagine the game, from how players run on grass to how they manage their finances. In FIFA, you are in complete control of the action. What is the EASPORTSM? The EASPORTSM is the most advanced controller in football gaming. It is a gamepad that lets you run, shoot, pass, dribble, and control the ball the way the professionals do. A two-button thumbstick allows you to precisely guide the ball, and this works with the natural, responsive haptic feedback of the controller to help you feel the game. Your hands, rather than your eyes, are where the action is. What is FIFA Ultimate Team? FUT is a feature that has captured the imagination of fans all over the world, and we want to bring the full FIFA experience to as many of them as possible. In FUT, you can create your own Ultimate Team of players, all with their own unique attributes, abilities, and profiles to help them adapt to different situations. When you're ready, you can trade, sell, or retire any player in FUT, so you can build the team that best fits your style of play. There are new ways to play with FUT, like the trading card format and a user-friendly skill rating system. What is the Player Impact Engine™? The PIE simulates every aspect of what it takes to be a great soccer player, not just on the field, but off it as well. For example, you can now control the intensity of the physical contact in a matchup, creating more realistic, dynamic gameplay. In addition, each player has a personal off-field story, which allows you to explore the full personalities of your players. How is the Player Impact Engine™ made? The PIE is the result of iterating on improvements made to the player animation and physics systems since the last FIFA game. The PIE is at the heart of FIFA Ultimate Team™, delivering improvements to gameplay, game balance, and FUT's much-admired gameplay mechanisms. What are the new innovations? Whether you're playing on your own, your friends, or online, we have
