Only 1 Robux code generator can be used without generating another. But that's only if you don't use the code generator. In fact, you would. You can buy robux for real money, use them on your own free Robux accounts. If you have a robux account with a balance of at least \$1, you can buy robux for real money. You can see how to generate codes in the video below. So, I used one of the generators, and it didn't work. As soon as I used the generator, I lost all of my money. All of it. So why would I tell you to use a free robux generator? Because it's actually a scam. In fact, there's a scammer named "Flat Robux" that makes it look like someone stole your account. The people running the robux codes are in touch with the robux thieves. So they know that Robux codes are bad, and they can stop it. If you use the Robux code generator, the Robux thieves will see it. The thieves would love to see another person using the generator, so they'd go to the Robux thieves' site and report it. And they're going to do it whenever you use a free robux code generator. After stealing your money, they'd look for a site that doesn't mention how you lost it. The thieves are smart. They would know that they made a mistake. So they'd send an email to the Robux thieves. It would say, "Hey, this guy doesn't even know that he lost his robux." The thieves would then force the Robux code generator to steal more robux from him. And then they'd tell him that he's a fool. Here's the procedure to install Roblox using this APK 1. First of all enable installation from unknown sources and also update your softwares and required apps like Google Play Games or Parse. 2. Launch the Setup (Apk) File. Don't be afraid, it's about to get fun. 3. Wait! Wait! Install Now! 4. Done! (Please) just have a look into app permissions. There is nothing bad in here. 1. Personal data is not compromised, only details pertaining to your Account are shared. 2. Network is used to download content. Again the most content has to be downloaded by local servers to be playable so there is no security breach as a result. 3. However, the app requires location at some point to make sure your home network is safe. It's a requirement by the developers and you cannot override. 4. Anonymous information is also shared in some circumstances like when you upload Content for your friends. 5. We highly recommend to scan your phone for viruses like explained here.
