Analysis: Shadow Lake, if anything, is scarier. It's a game that shines most when you're afraid, and it has you on high alert throughout your entire adventure. The dialogue and characters add to that atmosphere, fleshing out the game with more believable characters and voicing their dry humor with some surprising and awkward moments that don't take away from the game's overall horror feel. The story also gets darker as it progresses, starting as basically a supernatural collection of jokes instead of a straight-up ghost story. And hey, dead inmates! And monsters! And unsolved murders! And crazy stuff like that. Got down a bit with the rambling, though. The actual gameplay is where things went flat, though. Along with being far less interesting than its predecessors, Shadow Lake has some very repetitive gameplay elements that you'll get used to after a while, especially since most of them are triggered by your psychic ability. The biggest problem with the user interface here is that it's a bit obtuse for a game with such shortfalls. Literally, it looks like this: how did any one create such a non-intuitive user interface? Navigation between inventory, clues, and mini-map can be a tedious process in the beginning, but thankfully the game smoothes over these issues with a tiered system. The problem is that the game doesn't always appear to be leveling that system out, instead leaving much of the user interface as a crash course. It's just not intuitive. Shadow Lake feels like a free to play horror game that was ported over to mobile devices due to its lower initial capital. If you don't like the idea of being overcharged for mobile games or forced to play under uncomfortable terms, then there are better choices than Shadow Lake. Sec8ef588b
