
IK Multimedia MODO BASS V1.5.0 Incl ~REPACK~ Keygen.rar 64 Bit

modo bass is a versatile virtual instrument for bass guitar designed to create highly authentic and realistic basses. you can choose from a classic all-tube amp and 1x15 cab, or you can choose a powerhouse solid-state model with a 4x10 cab. each amp gives you full control over gain structure, eq (with mid-frequency adjustment on the tube amp), and additional fine-tuning options with a graphic eq. in addition to this, you can control the amount of the overdrive in the amp channel, which you can also fine-tune by using a graphic eq. with modo bass, you can create an unlimited variety of bass sounds. this is made possible by the innovative modo drum technology, which removes the limitations of traditional drum sample libraries, which is the new standard for realistic, natural and custom drum tracks. want to give your bass track a lift try going fretless. modo bass 2 adds the ability to make any bass in your collection a fretless* model. its an impressive feature you wont find anywhere else, instantly adding a distinctive vibe to your bass sound without the intonation challenges players face on

a fretless. explore the tonal possibilities of this game-changing new control. first, you can choose the actual number of strings on all models (4, 5 or 6) to determine the note scale range of the bass. in modo bass you can easily turn any 4-string model into a 5 or 6 string bass at a click of a mouse. in addition, with the drop function, you can extend the range of any model even further. the drop option tunes the lowest string one tone lower, bringing it from e to d (or from b to a in the case of a 5 or 6 string setup). besides extending the range of the bass, this loosens the string giving it a particular behavior and tone. drop tuning is typical in hard rock and metal.

IK Multimedia MODO BASS V1.5.0 Incl Keygen.rar 64 Bit

modo bass includes a complete set of dynamic touch sensors, including fret, ppj, and ric. you can also drag the touch bar and start making fretswitches, or use any of the included presets. modo bass is the first virtual instrument which includes a built-in fretboard which, rather than inaudibly clicking in place, responds dynamically to your technique! simply play along with modo bass and see the response in real time and hear the instrument move to mimic the action of a real bass guitar. modo bass is complete with a complete set of dynamic touch sensors, including fret, ppj, and ric. you can also drag the touch bar and start making fretswitches, or use any of the included presets. modo bass is the first virtual instrument which includes a built-in fretboard which, rather than inaudibly clicking in place, responds dynamically to your technique! simply play along with modo bass and see the response in real time and hear the instrument move to mimic the action of a real bass guitar. one of the most special features of modo bass is the ability to listen to all the tones you make on the instrument before you apply any effect. normally, on any other virtual instrument, you have to make the tone first and then apply the effects. modo bass sounds real, lets you make creative musical choices as you play, and provides extensive control over the tone. modo bass lets you dynamically create all tones, from the gritty, to the clean, from the loud to the soft, from the overdriven to the clean, etc. for improved bass-

guitar feel modo bass comes with an auto-harmonic feature that automatically detects the harmonic overtones of the lowest notes in a bass line and uses the proper partials for an even more realistic bass tone. even without a slapback effect or amp tone shaping, modo bass has the same tonal characteristics as a commercial solid-state bass amp. the advantages of its tube-amp modeling are enhanced by an unprecedented 16db - 18db of eq range that can be fine-tuned dynamically for maximum sound quality. bass line dynamic range (dbr) gauge also shows maximum dynamic range at a glance.
