### Sm100 Sap Solution Manager Pdf 25

this section introduces the basic requirements for creating the sap solution manager roles. then, we walk through the process of creating the roles, in order to introduce the associated responsibilities. welcome to my post. i also hope that my work will also a useful guide to other people who want to implement an sap solution. once the main business is to be able to easily maintain the software and hardware life cycle. in this guide, we will try to explain you how to create, edit and track your product in sap solution manager. we will focus on the role of the solution manager as a role the sap system and other system. this is the main user who uses the application in the environment. in some cases, administrators are the representative of the customer (an organization) who is using the solution. these owners (customers) are responsible for the monitoring and trouble-shooting of the software. when i tested sm100, it seemed to be great. i don't know why it does not support sap hana. i tested sm100 in this environment with hana database. sm100 version is 7.2 and platform is 64 bit windows 7. i have downloaded latest hana sdk and tested all versions of hana sdk on sm100. i can see hana databases in hana gui. the problem is not related to databases, i could install and start the sdk application and test new modules. the cd installs but, i do not seem to have a boot image present on my system. i am not even able to see the boot image at all in the assembly deployment selection options. do i need to do anyothersomething in addition to this? 5ec8ef588b
