Over a long time, the keyboard macros for Windows became very common and each of us is familiar with some of them. If you are not satisfied with your chosen macros for daily use, the software Keymacro may be a helpful tool for you. What the program does The program allows you to set custom keyboard shortcuts that will perform specific functions when they are executed. For example, the application can be used to quickly copy and paste text to the clipboard, open the calculator, open the Internet browser or launch a specific application or program. The list of keyboard shortcuts is customizable, so you can create your own custom combinations. How the program works Each keyboard shortcut is created in the program and assigned a function. You can assign multiple functions to one shortcut, so you can easily use several keyboard commands by executing just one keyboard shortcut. The program displays a map that shows where the function buttons are located, so you can easily customize the shortcuts. You can also choose from different styles and colors. The application is easy to use and intuitive. For example, if you want to assign a shortcut for opening the calculator, the program automatically opens the calculator. Similarly, if you want to paste a large chunk of text, the application opens the clipboard, ready to paste. However, if you want to paste the text without selecting it, you must first right click on it. On the other hand, if you want to copy a selected text, you must press the CTRL + C keys. One of the most common use of keyboard macros is to quickly launch a program. For example, if you use the CTRL + S keys, the program will open the notepad. The program automatically creates an index file that lists the name of the program, as well as the shortcut key. Another function of the program is to create shortcuts for frequently used programs. For example, you can create keyboard shortcuts for the calculator, the Internet browser, the desktop and any other programs that you need to execute. The program allows you to create keyboard shortcuts without a mouse, by using a keyboard combination. If you are using a laptop, you can create the shortcuts for your applications and the computer will launch them without you having to touch the keyboard. The program comes with a wizard, that walks you through the process of creating the keyboard shortcuts. The wizard also allows you to create shortcuts for programs that are not on your computer, so you can launch them using a remote computer. Finally, the program has a very simple and easy-to 2edc1e01e8

What's New In PCRunLog?

PCRunLog is a utility that can be used to help you keep tabs on your personal workout sessions. With it, you can record information about your workout activities and download all of the data to your computer. Features: -Keep track of workouts. -Count the number of repetitions and set a goal. -Save your data in your own diary-like interface. -Print out your data. -Convert units of measurement. -View your activity logs in various graphs. -Display your data in a specific date range. -Edit and delete a row. -Control multiple diaries. -Displays a calendar when you have daily goals. -Record how many miles you’ve walked or run. -Update your shoe-mileage. -Tracks your running time. -Presents the calendar. In collaboration with all the main beach volleyball competitions, FreeSports.tv is the official tennis, football and rugby live streaming portal to provide live streams from the biggest sporting events in the world. This application is a great resource for live streaming the beach volleyball and surf lifesaving competitions. What is new in this version: - Fixed a long time bug where the content at the home screen was not being updated Surfers Helpers is a pretty simple and yet very useful utility. This application can be used to keep tabs on all the information that can be saved about your surf session. Your surf history, the weather and all the waves you have surfed are all captured in this application. The interface of the application is pretty simple, with all the important settings being clearly located at the top of the application. The application makes it easy to save photos of your sessions, as well as to specify the length and duration of each surfing trip. The application also makes it possible to specify the location of each surfing session, since you can edit the string of information that will be saved about the surf session. You can also use Surfers Helper to automatically register your surfing sessions, by simply entering the latitude and longitude of the spot where you have surfed. The application also allows you to create multiple diaries, one for each surfing session that you have. There is also a logbook, so you can keep track of all your surfing sessions with the application. Finally, Surfers Helper also helps you find the best surf spots to visit and provide you with a list of waves you can surf. All in all, Surfers Helper is a handy and easy to use application that makes it possible to keep tabs on your surf sessions. Download Surfers Helper right now! The well-known app, Little Fix, has been updated and upgraded with the latest set of features. The new version of Little Fix is now more stable and less prone to crash. For new users, the update brings
