It doesn't show professional advice but can give you an idea on where to start when you're about to negotiate with a bank. Easy to install, no web access required Developed as a Metro-style application for desktops and mobile devices running Windows 8, 8.1 and 10, the tool can be integrated into your Start Screen or Menu from the Store, since it's signed by Microsoft. You should know that it's not mandatory to have an active Internet connection to work with this app, since it doesn't require web access. Therefore, you can fire it up to make calculations even when you're offline. Set the principal, interest rate, and term It doesn't put emphasis on visual appeal when it comes to its interface. Showing all finance options in the main window right at startup, RapidCalc Machine focuses on functionality, providing you with a clean and distraction-free environment for performing some elementary calculations. It's necessary to enter the principal amount, rate of interest, and number of months, then click the "Simple Interest" and "Compound Interest" buttons to determine these two values. There is no currency displayed, so the numbers are generally applicable. Calculate simple and compound interest Unfortunately, the interest calculator doesn't have any other notable options, aside from the fact that it lets you take a snapshot and share it using an external Modern UI program, thanks to the fact that it gets integrated with the OS share charm. All things considered, RapidCalc Machine doesn't bring any new features to the table. Nevertheless, it supplies you with a quick and convenient method for calculating simple and compound interest based on the principal amount, rate of interest, and number 2edc1e01e8
