A: Content Grabber is: a tool for extracting data from websites. Content Grabber is only able to extract content that can be identified from the URL. This tool may not be suitable for you because it requires you to know the full URL of a website in order to start scraping it. Content Grabber is not a music downloader. Why isn't Content Grabber a music downloader? To be able to write about tools I have to experience them. I've downloaded lots of music from The Pirate Bay using Deluge because it has everything I wanted from a music downloader: low bandwidth. The point of Deluge is that you save the file to disk, and it becomes a music downloader. Deluge is pretty bare-bones, and doesn't have the same features as a download manager, such as queue management, fast-forwards and more. The interface is also a lot simpler, with no option to "Play Local File". Content Grabber saves the files to your computer. It's up to you to organize them, or not. If you want to download the files to your local storage, you could use a download manager like : Deluge : Deluge is a BitTorrent client for Windows. Deluge is a cross between a download manager and a BitTorrent client.. It's up to you. Content Grabber is just a tool for scraping websites. Content Grabber is available as a standalone offline installer, and
